

Asiamed LaserPen

State-of-the-art Technique for non-invasive treatment

The compact laser with comprehensive functions for a wide range of indications

Think ahead. Gain patients.

The future of acupuncture is already in full swing. The LaserPen by Asiamed is the new, innovative solution for extensive use during laser therapy and diagnostics.

- painless acupuncture
- non-invasive
- precise
- intra-oral
- suitable for muscle and trigger point treatments
- interchangeable tips for diverse applications

The multi-functional Asiamed LaserPen is portable and easy to use. Ideal for applications outside the clinic - great for sports medicine, physical therapy and home visits!

Frequency programmes (pre-programmed):

- Continuous beam
 - History frequency
 - 7 NOGIER frequencies
 - 7 BAHF frequencies
 - 8 Chakra frequencies (BAHR)
 - Meridian frequencies (REININGER)
 - Allergy, tinnitus, viral, bacterial (REININGER)
-
- The laser output with precision optics for high illumination enables exact, pointed irradiation (auricular medicine, joints).
 - The LaserPen includes integrated high-performance storage batteries and a charging station. The LaserPen is delivered with high-quality NiMHd rechargeable batteries. Also included: one pair of protection glasses, instruction manual, warning sign "Laser Radiation" according to DIN EN 60825-1, and carrying case.
 - Comes standard with a limited (2) year warranty

Available Configurations:
