Dear Valued Customer

September 7, 2021

I hope this letter reaches you with good health inside and out. We have all been challenged in different ways living in a pandemic era. We will conquer COVID-19 and life will get back to some kind of normal for each of us.

The purpose of this letter is to inform you of a color change in the Nasobih Nutra-Cream. You will notice a richer darker tone to the cream. This is due to a possible change in the growing conditions of some natural raw ingredients we use in the Nutra-Cream. Our suppliers report color changes in their extracts, this is likely due to altered growing conditions due to climate change, no one seems to know.

One thing I can tell you is that we have not changed anything in our ingredients list or production process. Nasobih Nutra-Cream has the same great ingredients, texture and scent as it always has. The only change is the darker color. We have chosen not to add artificial colors to the cream, Nasobih Nutra-Cream has always been formulated with natural ingredients and we want to keep it that way. Color changes in truly natural products used in Nasobih can occur so don't be alarmed.

Remember, Nasobih Nutra-Cream is one of the most powerful all natural anti-aging creams on the market with over 25 of nature's most potent ingredients that have been scientifically proven to protect the skin from damage caused by free radicals, the culprits in premature aging.

Questions and Answers:

Que: Will the darker color change the color of my skin?

Ans: No, the darker cream tone will absorb into the skin without any skin color change.

Que: Can the Nutra-Cream be used on all skin types, color, dry, oily etc.

Ans: Yes, Nasobih Nutra-Cream was formulated for all skin types and tones.

Please feel free to contact us at info@nasobih.com with any questions or concerns or
